

Google Street View for INTERFACExpress™

Google Street View is available throughout INTERFACExpress™ on residential and commercial listings.

What Can I Do With Street View?

Street View is an incredibly useful tool allowing agents the opportunity to place themselves virtually in front of the property. Users can explore the property and surrounding area in detail with 360 degree views, the ability to look up and down, and zooming functionality. Moreover, agents can virtually travel along streets, turn at intersections, and view roads and addresses labeled right within the view.

How Do I Open Street View?

There is a unique Street Eye View icon next to each listing on the search results page. This icon looks like a black car and is visible in both the Thumbnail View and Table View. Clicking on the icon will instantly open Street View. Street View can also be opened from each property page by selecting the Maps Tab and then clicking on the link "Street View".
